

## EEP SCHEDULE OF FEES

The Environmental Management Commission approved a two-fee system delineated by eight-digit hydrologic units (as defined by the U. S. Geological Survey). One fee has been set at a higher rate to reflect the parts of the state where project costs are increased because of factors such as urban constraints, higher land costs and limited restoration opportunities. The second fee is considered a standard fee for mitigation in areas that are not subject to the characteristics exhibited in higher fee watersheds.

This two-fee system currently applies to wetland and stream mitigation. The following hydrologic units are subject to the higher fees (organized by river basin): Broad 03050105; Cape Fear 03030002, 03030004, 03030005 and 03030007; Catawba 03050101, 03050102 and 03050103; French Broad 06010106, 06010105 and 06010108; Hiwassee 06020002; Little Tennessee 06010202, 06010203 and 06010204; Lumber 03040207; Neuse 03020201; New 05050001; Roanoke 03010107; Savannah 03060101 and 03060102; Tar-Pamlico 03020101; Watauga 06010103; White Oak 03030001 and 03020106; Yadkin 03040102, 03040103, 03040105 and 03040202.

The map provided below highlights these geographic areas.
